## ACCEPTANCE TO TRAVEL FOR RUSSIAN ADOPTIONS - INVITATION

The undersigned have received notification that the Russian Adoption Officials have identified a child that they believe meets the parameters of our Application to Search for a Child. We understand that we will not receive any medical or other specific information until we are in Russia. We understand that when we are in Russia, FTIA requires that we obtain an independent medical opinion before deciding to adopt the child identified for us. We understand that once we meet the child identified for us, if we feel there is a medical reason not to proceed with the adoption we will obtain a letter from a doctor to provide to the Russian Adoption Officials explaining the medical concerns. We understand that the Russian Adoption Officials may or may not refer another child to us at that time depending if the Russian Adoption Officials have or believe there is another child available for adoption that meets our parameters as stated in our home study. If another child is not available we understand that we will have to return to the US and wait for another referral and another “first” trip. We further understand that we will be responsible to pay all costs/expenses for another “first” trip.
